

You Are Not Alone

Urinary incontinence, a common condition, affects more than 350,000 people in Australia. Leaking urine or losing bladder control can affect people at all ages and both genders. Incontinence is not a disease. It is a symptom of an underlying problem.

All absorbent products are NOT created equal... *We Guarantee It!*

You can rely on Tranquility's promise of unsurpassed overall performance in the areas of...

- skin dryness
- odor reduction
- urine neutralization
- inhibition of bacterial growth

In fact, we guarantee it!

PREMIUM PROTECTION

PEACH MAT GUARANTEE®

- **Skin Dryness** - Moist skin is prone to irritation, breakdown and the formation of pressure sores. Tranquility products instantly absorb moisture and trap large volumes of urine that will not "squeeze out" even under pressure. The result is drier skin.
- **Odor Reduction** - One of the most distressing, yet pervasive characteristics of incontinence is the telltale ammonia odor of urine. Tranquility products eliminate the urine odor.
- **Urine Neutralization** - The pH levels of urine are unhealthy for skin. Tranquility products quickly capture urine and neutralize the pH level to promote healthy skin environment.
- **Inhibition of Bacterial Growth** - Unabsorbed urine is an ideal breeding ground for bacteria and other organisms. This can easily lead to complications, including urinary tract infections. Tranquility products lock away urine creating a safer skin environment.

Peach Mat Construction

Tranquility products use the patented Peach Mat Construction, a unique blend of fast-acting and high-retention absorbent polymers that provide an unsurpassed level of protection and absorbency. That is why Tranquility products are Rated #1 by Caregivers and Medical Professionals.

Absorbency Levels

A normal urine void is 240ml. Products that absorb 1 cup are considered light protection, 2 cups moderate protection, 3 cups heavy protection and 4 cups maximum protection. Each individual Tranquility product displays its actual fluid capacity using easy-to-read standard measuring cups.

Absorbency Index

Each package displays an Absorbency Index. The individual product fluid capacity is represented by easy-to-read standard measuring cups used for quick visual reference. The fluid capacity is also written in ounces and millilitres.

Example: Premium OverNight Disposable Absorbent Underwear, size large

Cost-effectiveness

High performance Tranquility products can eliminate the need for frequent changes and can actually result in significantly lower total daily expense.

Convenience

Fewer changes mean less labour and allows for restoration of normal sleep patterns. Tranquility high performance products give you confidence to resume a happy, productive life.

C.U.P. (Capacity Under Pressure)

The measure of "fluid capacity" of ALL Tranquility absorbent products uses a test method that simulates wearing conditions. The test exerts pressure on the product after saturation.

The amount of moisture that is retained after pressure is applied (liquid absorbed by product that cannot be forced out), is the cup amount that is displayed on the package of each absorbent product in every size as ACTUL fluid capacity. Absorbent products absorb more fluid under "free-swell" conditions than they retain under pressure.

Loved ones that are using incontinence products are sitting, standing, walking and lying down - all of which exerts pressure on the product. Loving caregivers are actually aware that RETENTION is a key factor in incontinence management.

Feel confident in choosing Tranquility brand as your incontinence solution. There is a full line of all sizes and levels of protection from which to select and every one is backed by the Peach Mat Guarantee® that promises skin dryness, odor reduction, urine neutralization and inhibition of bacterial growth.
